FIG. 16

A graphical user interface window with a rectangular border. Inside, there are three stacked rectangular boxes. The top box contains the text "1602" on the right side. The middle box contains the text "Detailed steps to resolve the issue" on the left and "1604" on the right. The bottom box contains the text "Dynamically show links to resolutions" on the left and "1606" on the right. Below these boxes, there are three buttons arranged horizontally: "Help", "OK", and "Cancel and try again".

FIG. 17

A graphical user interface window with a rectangular border. At the top, there is a rectangular box containing the text "Dialing Error 602 - Unable to connect to the internet because there is an open Port." Below this box, there is a larger rectangular box containing the text "We are unable to connect you to the internet at this time because we have determined that the modem is being utilized by another utility or application. Please do the following to resolve this issue:" followed by a numbered list: "1. Please make sure that there are no other services using the modem at this time. (Display any other apps that may be using the connection)" and "2. Please reboot your computer and restart MSN 8." At the bottom of the window, there are three buttons arranged horizontally: "Help", "OK", and "Cancel and try again".

FIG. 18

Dialing Error 678 - Unable to connect to the internet because there was no answer.

We are unable to connect you to the internet at this time because there is no answer from the remote server. Please do the following to resolve this issue:

1. Please make sure that you have more than one number selected for dialing.
(Link to connection settings to display the phonebook for more numbers.)
"Click here for a list of available numbers."
2. Please verify your dialing properties. (For example - If you need to dial ten-digits please ensure that you have selected to dial the area code first.)
"Click here for your current dialing configuraiton"
3. Click here to check for new pop numbers.
"Click here for a list of phone numbers in your area."

FIG. 19

Dialing Error 101 - You have been disconnect from the internet.

We noticed that you have been disconnected from the MSN. Please check the following to prevent this from occurring in the future:

1. Please check your connection settings and make sure that you have call waiting disabled. (Unless you would like to be switched offline when someone calls.)
"Click here to view connection settings."
2. Please make sure that you have as many access numbers as possible selected.
"Click here to view your access numbers"
3. Please make sure that you have a current list of phone numbers.
"Click here to download a current list of phone numbers."

FIG. 20

Dialing Error 680 - Unable to connect to the internet because there was no dial tone..

We are unable to connect you to the internet at this time because we have determined that there is no dial tone. Please do the following to resolve this issue:

1. Please make sure that you are hearing your modem and its attempt to connect to the internet.
2. Please make sure that if you have voice mail, that you check your messages since a stuttered dial tone will not be detected as a dial tone.
3. Please check to make sure that your using the correct dialing options (pulse dialing v. tone dialing.)
